Visit of MISEREOR delegates & Stakeholders Meeting on 25th Oct.2011

In the process of fighting for the rights of the rickshaw pullers and construction labourers, while given charter of demands/applications to the relevant departments, government officials, they have avoided to receive applications. To achieve the purpose pressure technique was used and at last they have received charter of demands and applications. After a long advocacy and follow up done by different groups on the issue

of shelter, Municipal Corporation prepared **24 permanent shelters (Rain Basera)** (some of them are now under construction) in different places of the city. 11 community people got home under **Manyaver Shri Kanshiram Sahari Garib Awash Yojana** and 30 community people got houses in another house scheme, and 62 more people are in process they already got receiving for house and they will also get house soon from DUDA.

Since, the target group of the City Maker project is construction laborer/Rickshaw pullars who goes for the work early in the morning, it has been realized that activities can be implemented only on their addas and near to their residences during the night or early morning times. Hence, most of the activities have been planned in such a way that they can be accomplished as per the target community availability and their comfortability. With the sincere efforts by the WSS staff, rapport has been developed with the target community and now all the activities of the project are running in a very easy way. People are sharing their problems and issues very seriously in every group/individual meetings. Cooperation/networking has been developed with the hospitals and government department. One central minister also promised to help in achieving the objectives of the project. Kanpur Municipal cooperation has also been contacted to provide basic amenities to the deprived and marginalized groups. Some success has been achieved by providing drinking water facilities and toilets construction. For other facilities like drainage, electricity and health efforts are continuing.
